Professional Summary

Full-Stack Developer with production experience building a client-facing identity-verification platform (React, Node.js, Express, MongoDB) integrating Aadhaar with DigiLocker for real-time identity checks. Implemented encryption, password hashing, and end-to-end automated test coverage (Chai, Mocha, Cypress). Comfortable owning a feature from requirements through to a live.

Experience

Full Stack Developer Intern, DappLogix Software Pvt Ltd

01/2026 – 09/2026

T-Hub, Hyderabad

- Owned end-to-end development of the candidate self-verification portal, working directly with the client to gather requirements and translating them into shipped frontend and backend features
- Built the complete Aadhaar identity-verification flow from scratch by integrating DigiLocker APIs — designing the frontend verification UI and the backend logic that validated, processed, and securely stored identity data
- Implemented encryption and decryption for sensitive candidate data and password hashing to secure user credentials, replacing plaintext handling with a proper security layer across the verification flow
- Wrote and maintained the automated test suite for the self-verification portal, covering both frontend (Cypress) and backend (Chai, Mocha) logic to catch regressions before deployment and keep the verification flow stable as new features shipped

Education

Full Stack Web Development, Masai School

11/2024 – 08/2025

Bachelor of Technology in Electronics,

08/2019 – 06/2023

Medak College Of Engineering And Technology

Skills

Technical Skills

JavaScript, Python, React.js, Node.js, Express.js

Databases & Tools

MongoDB, Postman, GitHub, Sublime Merge

Soft Skills

Adaptability, Teamwork, Problem Solving

Projects

BuyMart 📦, React, Node.js, Express, MongoDB, Jwt, Tailwind CSS

- Built the vendor-facing side of a multi-vendor e-commerce platform, including order tracking and profit monitoring for vendors, and implemented JWT-based authentication; also worked on customer-facing product browsing, search, and filtering

Eventify 📅, React, Redux, Firebase, Tailwind CSS

- Built a multi-step event-creation platform with real-time group chat using Redux and Firebase, along with guest management, automated email invitations, and event search — designed to make organizing and tracking guests for an event faster than manual coordination
